PROFILE

Passionate Computer Engineering student focused on building intelligent, scalable systems using AI and Machine Learning. Experienced in developing full-stack healthcare and civic-tech platforms with microservices architecture and ML integration. Driven to create real-world solutions that deliver measurable societal impact.

EDUCATION

B.E. Computer Engineering – Mahatma Gandhi Mission's College of Engineering & Technology (2027)
New Horizon Public School, Airoli
Integrated JEE & CET Engineering Preparation Program

TECHNICAL SKILLS

Languages: JavaScript, Python
Web & Backend: MERN Stack, REST APIs, FastAPI, Microservices Architecture
Tools: Git, Docker, Firebase, Postman
ML & Data: NumPy, Pandas, OpenCV, Hugging Face, Model Integration

KEY PROJECTS

Medicare.ai – Smart Healthcare Platform
Built multi-role healthcare system with location-based hospital discovery, token management, analytics dashboards, AI-assisted symptom checking, and medical record handling using MERN + FastAPI + ML integration.

Health Insurance Transparency System
Developed structured clause interpretation and claim evaluation logic to improve policyholder decision clarity.

Air Quality Intelligence Platform (Hackathon)
Created ward-level pollution heat maps, complaint systems, and policy insight dashboards using Next.js & FastAPI.

Investment Portfolio Risk Analyzer (In Progress)
ML-driven portfolio risk evaluation and volatility prediction system using financial datasets.

EXPERIENCE & ACHIEVEMENTS

Adobe Hackathon – Participant (Rapid Prototyping & Team Collaboration)
Hack4Delhi – National Recognition (Top 200/1000+ teams; presented in New Delhi)
Kaggle MedGamma Challenge – Ongoing medical data modeling exploration

STRENGTHS

Builder mindset • Strong problem-solving • Self-driven learner • Impact-focused development • Growth-oriented

INTERESTS

Real-world tech solutions • Artificial Intelligence & Machine Learning • Scalable system design
